This action is responsive to the communication filed April 4, 2006.

The drawings and specification are objected to. On page 5, line 15, the inner end "70" is not shown in the drawings. On page 6, first full paragraph, both "an outlet face 102" and "the contact surface 102" are disclosed. Referring to disk 16, Figures 1, 5, and 6, page 6 recites "an elongated filter opening 110" but these drawings do not show such opening. Figures 5 and 6 show two elongated openings 108, 112, two through openings 104, 106, and the last through opening is unlabelled and undescribed. In Figure 13 "110" labels opening 108, in Figure 15 "108" labels 104, and in Figure 17 "104" labels 106 and "106" labels the undescribed opening. None of Figures 12, 14, and 16 label any of the relevant passages. It is virtually impossible to understand this part of the disclosure.

On page 6, line 28, it appears that it should read "mount 20 need not". On page 9, line 1 "an adapter 160" is mentioned but Figures 10, 11, 18, 21 show an adapter 162. This adapter 162 also conflicts with seal 162 of Figure 19. On page 11, first full paragraph, both "sealing rings 162, 164, and 166" and "grooves 162, 164, and 166" are mentioned. Notch 174 is not labeled in Figure 19. In Figure 4, "86" labels both 86 and 84.

While there is no specific requirement as to how much of the drawings need be labeled, additional labeling would help to understand the invention. Figures 13, 14, 16 have been mentioned. "108" in Figure 5 and "112" in Figure 6 would be helpful. In Figure 11, elements 60, 88, 90, 92, 94, 104, 106, 116, 118, 120, 122, and 128, all of which are important to an understanding of the invention, are visible but unlabeled.

The drawings are objected to for the reasons above. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

The specification is objected to for the reasons above. Correction is required.

This application contains claims directed to the following patentably distinct species

Figures 1-17

Figures 18-20

Figures 21-23.

The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, at least claims 1-3 appear to be generic.

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

**Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species to be examined** even though the requirement may be traversed (37 CFR 1.143) **and (ii) identification of the claims encompassing the elected species**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at

the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Fox whose telephone number is 571-272-4912. The examiner can normally be reached on Monday-Saturday from 10am-6pm (Hoteling Program).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Huson can be reached on 571-272-4887. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
